программы/field of study «Computer Science»

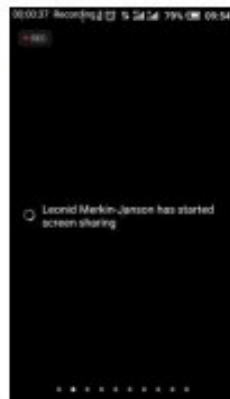

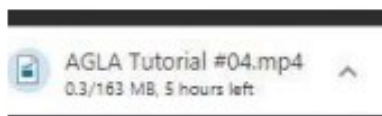

### ЗАЯВЛЕНИЕ /APPLICATION

I kindly request for the academic leave due to financial reasons, bad networks, electricity and online classes for the period of 1 year from 12.10.2020 to 11.10.2021.

Financial reasons: Aside from all other challenges I still didn't give-up because I planned on getting external teacher here in Nigeria to teach me more because I learn more with face to face teaching. The money for my trip is not enough and my parents are still spending more on data and external teachers which is not in my trip budget. I can't say too much about my family financial challenges but I can tell you it is more than what I have explained.

Bad network:

Online classes: Sometimes the professor speech is faster than what he is writing. He would have finished what he was saying and about to move to the next explanation then the writings just appears on the screen. I am also the kind of person that learn more from classmates privately than TA.

### Electricity:

It all depends on your location. If a person stay in island or estate or close to big companies and industries then you get more electricity supply. In my area I get an average of 15 hours a day most times it is at night.

how many hours of electricity does nigeria supply
